

## 2019 Turkey Science and Production Conference Programme

Name	Organisation	Title
Santiago Avendano	Aviagen UK	Biotechnology in Turkey Production
Sylvain Briere	Hendrix Genetics, France	Innovations in turkey Research and Development
Greg Choulerton	sponsored by Aviagen Turkeys	Public perception of Turkey Meat
Albert Davleyev	AgriFood Strategies, Russia	Update on the turkey market in Russia
Francisco Dias	Delacon, Austria	Phylogenics feed additives to improve gut health in turkey
David Diez Aras	Biovet, Spain	Pronutrients (botanical molecules) improve the status of the digestive tract and prevent parasitosis in turkeys.
Claire Godener	Chêne Vert Conseil	Ornithobacterium rhinotracheale (ORT) autovaccination programme in turkey breeding
Marcus Kenny	Aviagen Turkeys	Physical Presentation of Turkey Feed
Mike Kogut	USDA, USA	Turkey Rearing Practices and Turkey Gut Health and Mucosal Immunity?
David Laurin	RCA Nutrition Canada sponsored by Hybrid Turkeys	The role of nutrition for optimal gut health'
Leonardo Linares	Zinpro, USA	Updates in Turkey Mineral Nutrition
Christian Woltering and Werner Mecklenberg	Big Dutchman, Germany	Making use of modern smartphone and professional digital cloud data collection methods to optimise turkey management'
Hartmut Meyer	Moorgut Kartzfehn, Germany	The dilemma of optimising welfare outcomes and minimizing interventions for beak management in turkeys in Germany
Raj Murugesan	Biomin, USA	Key to bridge the gap between challenge and performance in ABF production- gut microbiome
Greg Page	Nutreco, Canada	A mechanistic model approach to Turkey feed program cost optimization
Vasil Pirgozliev	Harper Adams University, UK	Effect of graded levels of supplementary phytase in diets with and without rapeseed meal on energy utilisation, nutrient availability and phytate degradation in young turkeys
Isabelle Pouget	Techna, France	Which strategy for calcium and phosphorus supply for turkeys from 0 to 70 days ? Impacts on physiology and performances?
Karen Schwean-Lardner	Univ Saskatchewan, Canada	Turkey transportation: Impact of temperature/humidity and duration on bird welfare
Doug Smith	Diamond V, USA	Benefits of modulating turkeys' immune system beyond disease prevention!
Monita Vereecken	Huvepharma, Belgium	An updated vision on coccidiosis control in turkeys
Dr. Andy Wales	Univ of Surrey, UK	Farm management and antibiotic resistance
Alexandra Wealleans	Kemin, UK	Antibiotic Reduction through Nutrition
Ewelina Wójcik	Proteonpharma, Poland	Feed additive bacteriophages as a strategy towards improving turkey health
